

W.T.P.S. Gauge w/Calibration Block Measure Undercut 0.010 Deep

Cat # 7L

Undercut shall be no more than 0.010 in. (0.25 mm) deep when the weld is transverse to the primary stress in the part that is undercut.

From G.A.L. Gage Company, the W.T.P.S. Gauge is precision made from stainless steel all markings and dimensions are laser engraved for ease and clarity when reading.

Gauge set comes with a precision ground calibration block as shown above; each block has been surface ground to 0.0005 tolerance for exceptional accuracy.

Set also includes one Mini Maglite® AAA Flashlight (Lumens: 100) w/Pocket Clip, batteries and protective carry case.
